

Easily removes adhesive from a wide variety of material surfaces. A water-soluble and non-flammable formula.

Where To Use

| | | |
|--------------|----------------|------------------------------|
| Detail Shops | Poly Banners | Residues on Painted Aluminum |
| Glass | Polycarbonates | Removing Window Tinting |
| Vinyl | Auto Paint | Removing Decals |
| Plexiglass | | |

Directions

Once the vinyl or decal graphics have been removed with heat, use the spray on the remaining adhesive. Allow to stand on the surface for 30 seconds - more difficult jobs may require more standing time. Use a dry cloth or squeegee to wipe away the residue, then rinse thoroughly with water. Paint must be completely cured before application. Use only on oil-based enamel surfaces. This spray is not recommended for use on latex paint backgrounds.

Technical Specifications
